

## Accessories for High Noise Locations

For industrial factory workers, tactical teams, racing crews, or any user that operates in a high-noise environment, PRYME offers a variety of products that block background noise so that your voice can be transmitted intelligibly. Our transducer-based microphone design picks up voice audio by sensing vibrations through the user's skin, not through the air like a traditional microphone. This allows the microphone to pick up the sound of the user's voice while rejecting most of the background noise, allowing you to be heard.

### SELECTOR GUIDE FOR HIGH NOISE LOCATIONS

<p><b>Gladiator™ SPM-1500 Series</b></p> <p>Recommended for Motorsports, Public Safety, and Industrial</p> <p><b>MSRP \$90–\$110</b></p> 	 <p><b>THROAT MIC</b></p>	<ul style="list-style-type: none"> <li>• Tactical, heavy-duty throat microphone with acoustic earphone</li> <li>• Blocks background noise by picking up the sound of the user's voice directly from vocal chord vibration</li> <li>• New single piece microphone for comfort with performance</li> <li>• Heavy-duty construction, featuring polyurethane cable, rubber, and high-impact polycarbonate</li> <li>• Clear acoustic tube style surveillance earphone made of heavy grade surgical tubing</li> <li>• Large PTT button for tactical set-up</li> <li>• Fits neck sizes from 12" to 17"</li> </ul>
