**Federal Communication Commission Interference Statement**

- Always turn the speaker microphone off when charging.
- Do not tamper with or modify the speaker microphone or charger.

**Charging Cautions:**

1. Plug the charge cable into any powered USB outlet, and then into the charge jack on the bottom of the speaker microphone.
2. Once the charging process has begun, the LED indicator on the speaker microphone will show a constant red light.
3. Typical charge time is approximately five hours. Actual charge time will vary depending on several factors including the battery's charge state, condition, and age.
4. The red and blue LEDs flash messages that let the user know the current status of the speaker microphone.
5. When the battery is fully charged the LED indicator on the bottom of the speaker microphone will turn off.
6. Disconnect the charger from the microphone when charging is completed.

**Reconnecting a Previously Pairing with a PRYMEBLU Radio Adapter or 2-way Radio**

When pairing the PRYMEBLU Speaker Microphone with a PRYMEBLU Radio Adapter or an Icom or Kenwood radio, make sure that the Speaker Microphone is powered off to start.

- Hold down the PTT button on the PRYMEBLU Speaker Microphone while turning the device on using the Power/Volume Knob. Continue to hold the button down for approximately 3 seconds, until you see the LED on the speaker microphone begin to quickly flash RED-BLUE-BLUE-BLUE in sequence. The PRYMEBLU Speaker Microphone is now in pairing mode.

- If you are pairing the microphone to a PRYMEBLU adapter, place the adapter into pairing mode following the instructions in the user's manual for that device. Typically, this is done by holding down the PTT button on the adapter while powering the adapter or attached two-way radio on and then continuing to hold the PTT button down until the LED on the adapter flashes two times per second.

- If you are pairing the microphone with an Icom or Kenwood two-way radio, follow the manufacturer's instructions to have the radio scan for nearby headsets. Once it finishes scanning, select the PRYMEBLU microphone from the list of nearby devices.

- After a few seconds, the two devices should sync to one another. Once the PRYMEBLU Speaker Microphone and adapter/radio are paired with each other the status LED on Speaker Microphone will then show one FLASH every few seconds.

- If a PRYMEBLU Radio Adapter does not detect the Speaker Microphone within 60 seconds of being put into pairing mode, the adapter will exit the pairing mode and resume normal operation.

- Once successfully paired, you will be able to operate your 2-way radio using the PRYMEBLU Speaker Mic.

**Controls and Connection**

- **PTT Button:** This button is used to activate the push-to-talk feature of the 2-way radio.
- **Phone Button:** This button is used to answer or hang up telephone calls when the BTH-500 is connected to a cellphone.
- **Volume Control/Power Knob:** This knob allows you to adjust the volume of received calls.
- **Status LEDs:** The red and blue LEDs flash messages that let the user know the current status of the speaker microphone.
- **Microphone:** This microphone picks up the user’s voice audio when sending a call.
- **Earphone Jack:** This jack is used to connect an optional, wired listen-only headset to the speaker microphone for enhanced privacy.
- **Front Firing Speaker:** Received calls are heard over this speaker. The volume level can be controlled using either the Volume/Power Knob buttons on the speaker microphone, or by using the volume controls on the two-way radio or phone.
- **Charge Jack:** This mini-USB jack is used to recharge the removable battery of the speaker microphone by connecting the BTH-500 to a USB charger or any powered USB source.
- **PTT Button:** This button is used to activate the push-to-talk feature of the 2-way radio.
- **Phone Button:** This button is used to answer or hang up telephone calls when the BTH-500 is connected to a cellphone.
- **Volume Control/Power Knob:** This knob allows you to adjust the volume of received calls.
- **Status LEDs:** The red and blue LEDs flash messages that let the user know the current status of the speaker microphone.
- **Microphone:** This microphone picks up the user’s voice audio when sending a call.

**PRYMEBLU BTH-500 Wireless Bluetooth Speaker Microphone**

For use with PRYMEBLU radio adapters and Icom and Kenwood radios with built-in Bluetooth.

- Once successfully paired, you will be able to operate your 2-way radio using the PRYMEBLU Speaker Mic.
Pairing with a Cellphone

The PRYMEBLU Bluetooth Speaker Microphone is capable of working with a Bluetooth-enabled cellphone. The speaker microphone is even capable of simultaneously pairing with both a PRYMEBLU Radio Adapter and a cellphone, enabling you to use the same speaker microphone for both radio and telephone calls.

**NOTE:** If you wish to use the multi-pairing feature to connect the BTH-500 to both a PRYMEBLU Radio Adapter and a cellphone, you must first pair the PRYMEBLU Speaker Microphone and PRYMEBLU Radio Adapter using the procedure shown on Page 4 of this manual. Once the two devices have been paired to each other, power the two-way radio/Bluetooth Radio Adapter off, and follow the procedure shown below:

When pairing the PRYMEBLU Speaker Microphone with a cellphone, make sure that the speaker microphone and all other nearby Bluetooth devices are powered off before beginning.

- Hold down the PTT Button on the PRYMEBLU Speaker Microphone while turning the device on using the Power/Volume Knob. Continue to hold the button down for approximately 3 seconds, until you see the LED on the speaker microphone begin to quickly flash RED-BLUE-RED-BLUE in sequence. The PRYMEBLU Power/Volume Knob is now in pairing mode.
- Select the PRYMEBLU Speaker Microphone from the list of Bluetooth devices shown on your phone. If the phone asks for a passcode, enter “0000.” The phone may also prompt you to confirm the connection.
- After a few seconds, the two devices should synch to one another. Once the PRYMEBLU Speaker Microphone and phone are paired with each other, the status LED on the microphone will revert back to a single blue flash every few seconds.
- Once successfully paired, you will be able to make and receive telephone calls using the PRYMEBLU Speaker Microphone.

**Multi-Pairing Operation**

Once you have successfully paired the PRYMEBLU Speaker Microphone and cellphone, you can enable multi-pairing for the BTH-500 by simply powering on the two-way radio/PRYMEBLU Radio Adapter that you previously paired with the PRYMEBLU Speaker Microphone. Within a few seconds, all three devices should synch to each other.

Using the PRYMEBLU Speaker Microphone

Once your PRYMEBLU Speaker Microphone and PRYMEBLU Adapter and/or cellphone have been paired together:

- Received signals will be heard over your PRYMEBLU Speaker Microphone’s front-ring speaker or through the optional earphone. The volume of received calls can be adjusted using the Volume/Power Knob on the speaker microphone or the volume control on the two-way radio or cellphone.
- When transmitting or on a phone call, the operator’s voice is picked up by the microphone in the PRYMEBLU Speaker Microphone.

**Push-to-Talk** can be activated one of several different ways:
- By pressing and holding the PTT button on the PRYMEBLU Speaker Microphone.
- By pressing and holding the Talk button on the PRYMEBLU Adapter.
- Using an optional wired PTT that is plugged into the PRYMEBLU Adapter.
- Using an optional PRYMEBLU Wireless Bluetooth PTT (model BT-PTT2, sold separately). Note that if you are using a PRYMEBLU BT-PTT2, you will first need to pair the adapter with the PTT using the instructions located in the PRYMEBLU PTT User’s Guide.

To answer or hang up a cellphone call, press the orange Phone Button on the side of the speaker microphone or use the user interface on the phone itself.

You can also activate your phone’s voice dialing feature by pressing and holding the Phone Button on the side of the microphone for three seconds. (This function works only when the microphone is NOT connected to a two-way radio.)

**NOTE:** When you are on a phone call, signals received by the two-way radio will not be heard. Additionally, if you press the PTT button on the PRYMEBLU Speaker Microphone while you are on a phone call, the two-way radio will transmit, however no transmit audio will be sent over the air, since microphone audio being routed to the cellphone.

**STATUS LED MESSAGES**

The meanings of the various status LED messages shown by the speaker microphone are shown on the following table:

<table>
<thead>
<tr>
<th>LED INDICATION</th>
<th>MEANING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Constant red (while plugged into charger)</td>
<td>Charge mode</td>
</tr>
<tr>
<td>No indication (while plugged into charger)</td>
<td>Charging is finished</td>
</tr>
<tr>
<td>Flashes red blue-red-blue repeatedly</td>
<td>Painting mode</td>
</tr>
<tr>
<td>Two blue flashes every two seconds</td>
<td>Speaker microphone is powered on but not paired</td>
</tr>
<tr>
<td>One blue flash every two seconds</td>
<td>Speaker microphone is powered and paired</td>
</tr>
<tr>
<td>Constant red with one blue flash every two seconds</td>
<td>PTT is pressed</td>
</tr>
<tr>
<td>No indication</td>
<td>Speaker microphone is powered off</td>
</tr>
</tbody>
</table>

**OPTIONAL EARPHONES**

Although the BTH-500 has a built-in speaker for listening to received calls, some users may prefer to use a listen only earphone for enhanced privacy. The accessory jack on the speaker microphone will accept any mono earphone with a 3.5 mm audio plug.

When an earphone is used, the front-firing speaker is disabled.

**PRYME EH-289XB model shown.**

**Earphone sold separately.**

PRYME makes a variety of listen-only earphones in different styles that will work with the BTH-500.

**SUPPORT AND WARRANTY**

PRYME Radio Products warrants this product against defects in materials or workmanship for a period of one year from the date of retail purchase. PRYME will repair or replace a defective unit, at our option, without charge for parts or labor. The limited warranty is extended only to the original purchaser and is valid only to consumers in the United States and Canada. It does not cover damage or failure caused by or attributable to Acts of God, abuse, misuse, improper or abnormal usage, faulty installation, improper maintenance, lightning, or other incidences of excessive voltage, or any tampering or repairs by other than a PRYME authorized repair facility. It does not cover replacement of consumable parts, transportation costs, or damage in transit.

Repair or replacement under the terms of this warranty does not extend the terms of this warranty. This warranty can only be modified by an officer of PRYME Radio Products, and then only in writing. Should this product prove defective in workmanship or material, the consumer’s sole remedies shall be such repair or replacement as provided by the terms of this warranty. Under no circumstances shall PRYME Radio Products be liable for any loss or damage, direct, consequential, or incidental, arising out of the use of or inability to use this product. Some states do not allow limitations on how long an implied warranty lasts or the exclusions or limitations of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights. You may also have other rights, which may vary, from state to state.

For support or warranty service on your PRYME product, contact us at 1-800-666-2654 or visit us on the web at www.PRYME.com.
