

HYDROS™ (Patent Pending) Radio Connectors

Available on select radio connector models, our new molded HYDROS™ connectors provide the very best resistance to the elements. Because the wires and electronic components inside of the connector are sealed beneath the hardened thermoplastic shell, the connector is completely waterproof and can be fully immersed, another industry first for PRYME!

- HYDROS™ - a fully molded, waterproof radio connector
- Flexible, Thermoplastic outer-shell is strong and extremely durable
- The radio side of the connector is rubberized to prevent the connector from rubbing or slipping
- Large, knurled thumbscrew which is completely retained and cannot be lost
- Heavy-duty, spring-loaded contact pins - gold plated
- Slimmer profile compared to most OEM radio connectors
- Available on select (multi-pin) radio connector products only

HYDROS™
