

BT-500 SERIES Wireless Bluetooth Adapters for Portable Radios

PRYMEBLU[®] wireless adapters allow you to use a compatible wireless headset or other audio accessory with your two-way radio.

The adapters pair easily with thousands of off-the-shelf Bluetooth headsets and remember paired connections, even if the radio is turned off. If used with a headset that supports multiple pairings, the PRYMEBLU[®] adapters enable operation of both your cellular phone and two-way radio with the same headset. The accessory jack also allows you to connect any PRYME QD™ (Quick Disconnect) series wired audio accessory, such as a remote Push-to-Talk or lapel microphone, in combination with the wireless headset.

FEATURES

- Allows you to use a wireless Bluetooth headset with your two-way radio in place of a speaker microphone or wired audio accessory
- Compatible with thousands of readily available Bluetooth headsets and other audio accessories. (Bluetooth headset not included)
- Easy pairing process. Remembers paired connection to the wireless headset even if powered off or removed from the two-way radio
- Several Push-To-Talk options: use the PTT button on the PRYMEBLU[®] adapter to initiate transmissions, use the optional PRYMEBLU[®] wireless Push-to-Talk, or use an optional PRYME Quick Disconnect wired audio accessory such as the PTT-5 (Optional accessories sold separately)
- Most (multi-pin connector) models are powered by the radio and do not require any batteries or charging. Simple pin models have an internal Li-Ion battery pack and must be recharged between uses.
- Enhance with optional wired PRYME QuickDisconnect earphone or audio accessory for additional privacy (Optional accessories are sold separately)
- Patented "Smart Switch" feature automatically routes RX and TX audio to the appropriate wireless or wired audio accessory depending on what accessories are connected to the PRYMEBLU[®] adapter. When no audio accessories are connected, audio is routed to the radio's internal speaker and microphone. (Smart Switch feature not available on all models)
- Status LED indicates connection to a compatible wireless accessory

PTT switch

QD™ accessory jack with patent pending "Smart Switch" technology

BT-523 SHOWN

MODEL	CONNECTOR	IMAGE	PRICE
FOR ICOM RADIOS
