

PRYME® Wireless and Wired Accessories for Radios and PoC Apps

WIRELESS AND WIRED ACCESSORIES FOR RADIOS / CELL PHONES AND TABLETS

Bluetooth for Two-Way Radios

BT-PTT2

Wireless PTT Switch for PRYMEBLU® Adapters

- Allows you to activate the two-way radio's push-to-talk function wirelessly
- Pairs quickly and easily with any PRYMEBLU adapter
- Remembers the paired connection even when the PTT, wireless headset, or two-way radio are powered off
- Automatically restores the wireless connection the next time the PTT and PRYMEBLU adapter are turned on
- Multi-function LED keeps user updated on the BT-PTT2's status
- Internal Li-Ion battery pack powers the BT-PTT2 for 12 hours or more on a single charge
- Can be held in the hand or attached to almost anything using the included durable metal clip
- Built-in USB charging jack allows the PTT2 to be charged from any USB charger (car, computer, cell phone, etc.)
- Requires a PRYMEBLU Bluetooth adapter (sold separately)

Bluetooth for Cellphones/Tablets Using PoC Apps

Zello, WAVE, KODIAK, ESChat, Voxer + more

BT-PTT-Z Mini (Zello)

BT-PTT-K Mini (Kodiak)

Wireless PTT switch for PTT apps

Bluetooth for Two-Way Radios

WTX-KIT

Cellphone Headset Adapter with Wireless PTT Switch

The WTX Wireless PTT Kit features BTLE (Bluetooth Low Energy) technology that eliminates the need for recharging batteries. The WTX adapter is powered by the radio, and the MINI wireless PTT is powered by an easy-to-change coin cell battery that lasts up to 2 years, using Bluetooth Low Energy Technology.

The two-way radio adapter uses a standard 3.5mm jack compatible with most "off-the-shelf" cell phone headsets (headset not included.) Kit includes a small, lightweight, wireless finger PTT switch with a velcro strap which can be attached to many things, such as steering wheels, handlebars, gear shifts, etc. Or just keep it in your pocket for covert operation.

- Simple to use radio adapter gets power directly from the radio. No charging required
- 3.5mm, 4 conductor jack allows the use of almost any "off-the-shelf" cellular headset (great for undercover/covert use.)
- Finger PTT is small, lightweight, and easy to carry, or use built-in Velcro strap to mount on steering wheel, handlebars, etc.
- Finger PTT uses inexpensive CR2032 battery for up to 2 years of service
- Easy to repair or replace individual radio adapters or finger PTT switches
- The WTX uses dynamic pairing, NOT FIXED PAIRING as other brands may use. VERY FLEXIBLE!
